Properties of Water Tutorial

Purpose: To create an online tutorial for one of the properties of water and present it to the class. Students will also learn how to summarize the importance of one of the properties of water by writing and presenting a tutorial using the iPad app ShowMe. You will upload your presentation to CANVAS and the class will view and critique it in a final presentation.

Directions:

1. Choose one of the following properties of water that you would like to teach the class:
   a. Heat Capacity
   b. Water's attraction to itself and other things
   c. Solvent Properties

2. What is the title of your tutorial?

3. Identify the key terms that you will need to highlight in your tutorial:

4. Why is your chosen water property essential to life?

5. What are the 3 most important things you want to explain to other students about your topic?

6. Are there any diagrams, pictures or examples in nature that would help you illustrate your point?

7. Write a script that utilizes the information you outlined above to create a tutorial for this assignment (1 page).

ShowMe Directions:

You are going to create a "Khan Academy" style presentation using the App "Show me" on an iPad. The following are general directions for doing so.

1. Write a draft of what you will say in your presentation.
2. Always include a title and overview of your discussion.
3. Tap the show me icon on your iPad.
4. Using the icons on the toolbar.
   1. Select a drawing color. You may change color throughout the presentation.
   2. The eraser icon will help you erase parts of the screen and the large eraser icon will clear the screen.
   3. You can also add a picture to the background to help you with your presentation.
5. When you are ready to record, press the red button and speak clearly as you write/draw.
6. Hit stop when you are done.
7. Name your presentation.
8. Press Save.
9. Sharing your presentation
   1. You will see a preview of your presentation. If you are unhappy redo it. When you are satisfied, press the cloud icon and "Private".
   2. Then "Finish".
   3. You may need to create an account.
   4. Once you have an account it will upload and give you options for sharing, choose "or share this link"
5. Open
6. Share
7. Embed
8. Select the link or email it to your self and add to the submission site in Canvas.
